

TriOptima

An office one longs for when you are off work!

As a business leader in the Fintech industry, TriOptima is growing steadily in size and have done so since the company was founded in 2000. The office, with its 3500 square meter, is in the newly built Master house, downtown Stockholm.

TriOptima understands the value of creating a workplace where employees feel comfortable and inspired. The intensive work, prior to the move, involved a reference-group in the interior design concept and the overall design of the office. The result of this was a unique, modern, colorful and homely office that the entire staff is proud and happy for!

Different wallpaper, light fixtures, carpets, furniture and set design have given all the rooms and workspaces in the office the wide variety of diverse nature, color, function and expression. No room is alike, each is different! Employees can therefore choose a room whose décor and environment suits their needs and mood. The classic workspaces have a calmer color palette of beige, blue and green. In the common social areas, there is plenty of space to hang out, eat, play and work.
